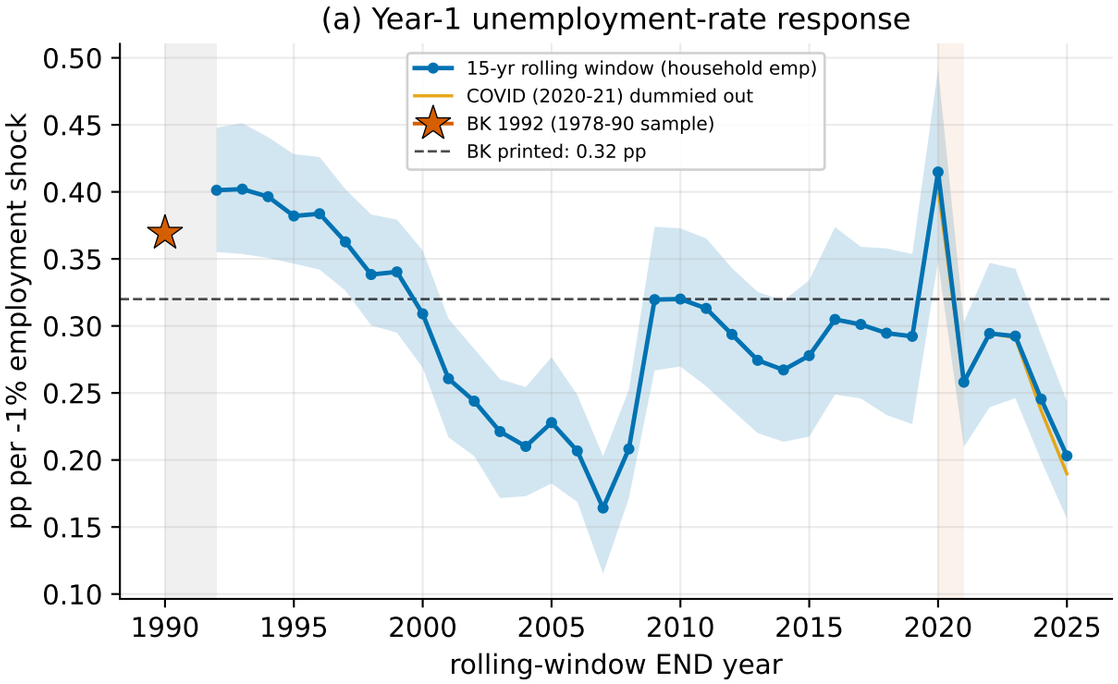
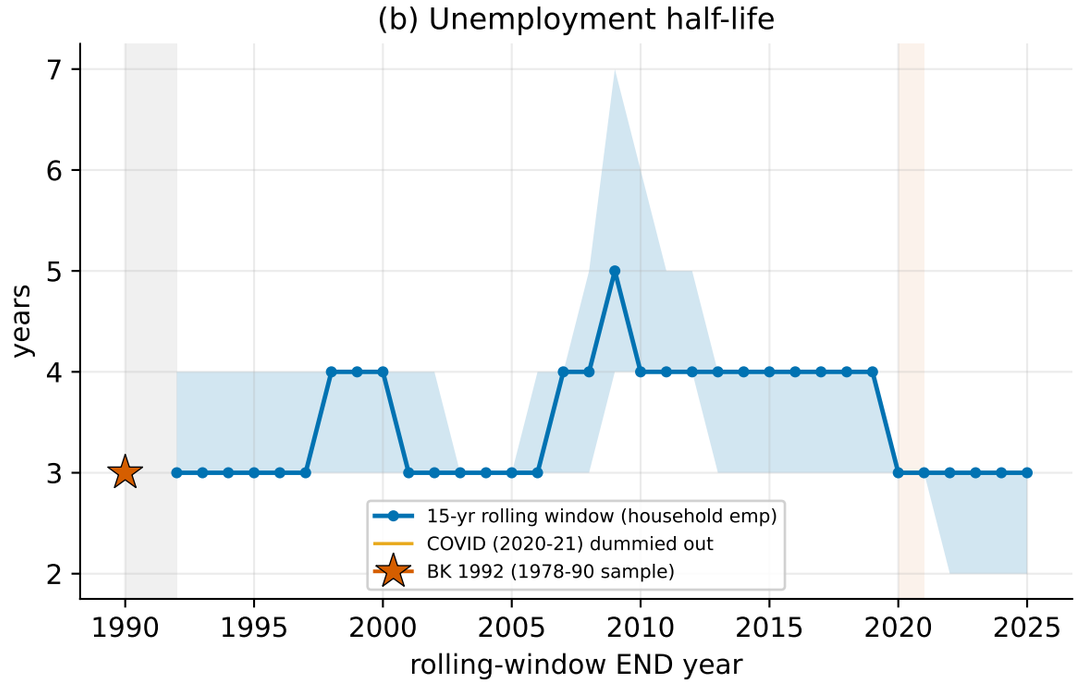
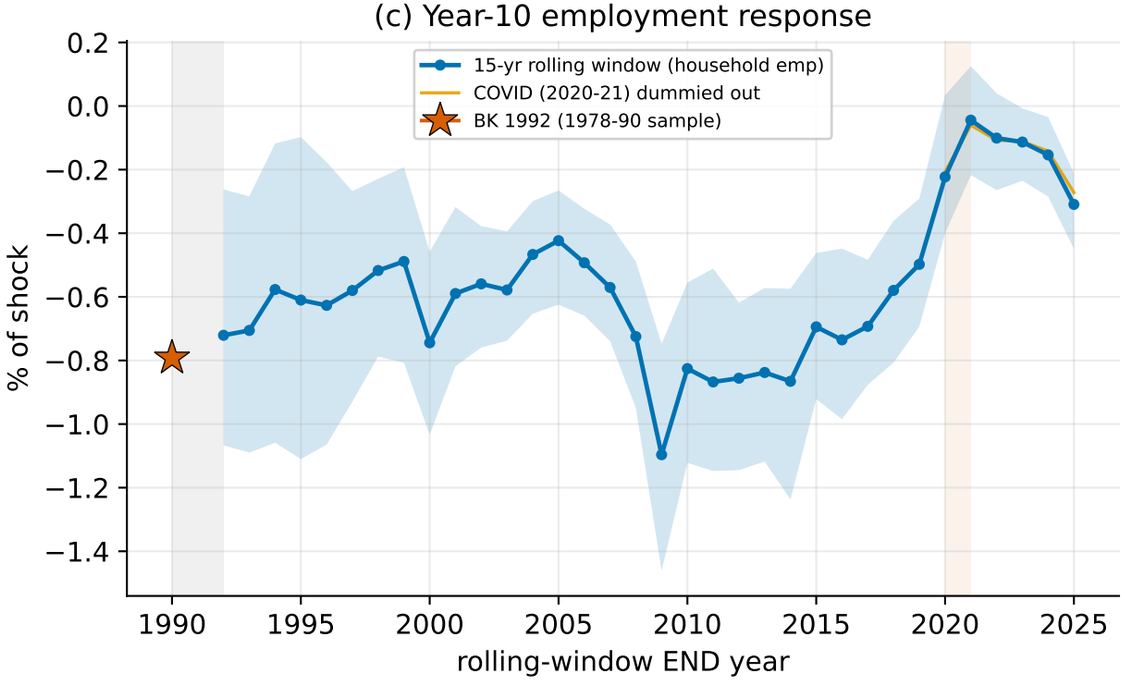
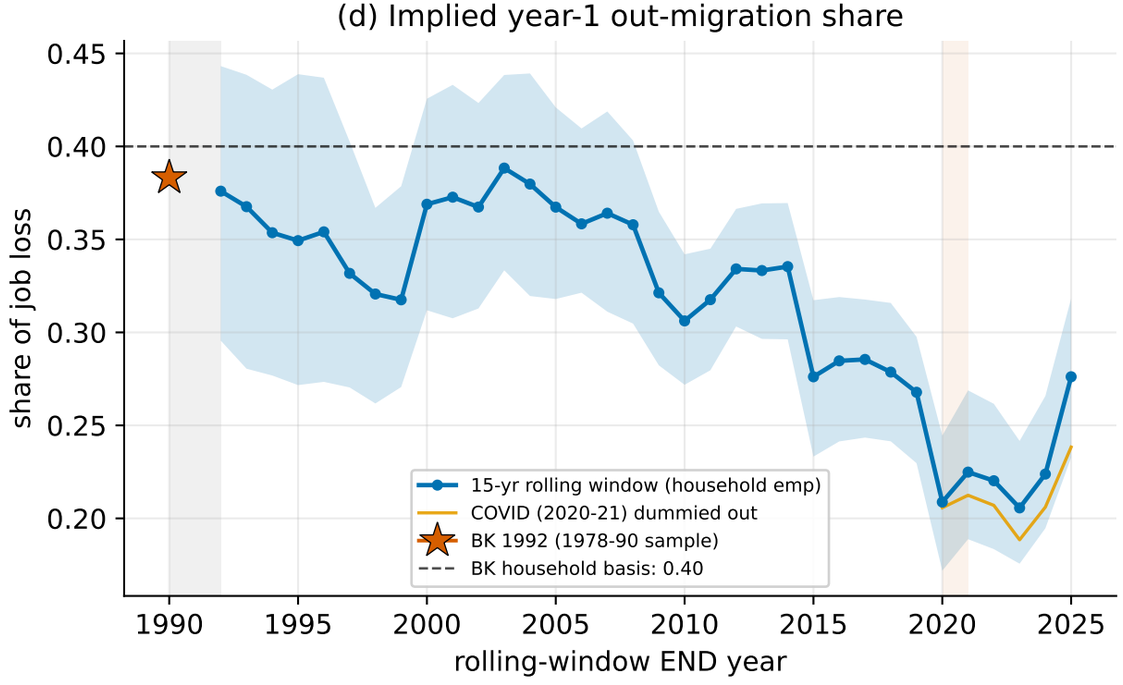
Do states still recover by out-migration? Blanchard-Katz (1992), re-estimated 1978-2025









Trivariate pooled fixed-effects VAR (2 lags) in relative household employment growth, employment/labor-force, and participation; -1% employment innovation.
Bands = 5-95th pctile, 200-rep state-cluster bootstrap. Grey band = original 1978-90 sample; red band = COVID years.
